# Roadmap to Learn C language

## STARTING FROM TODAY

Download and install the compiler

Get familiar with basic syntax and data type

Go through some basic example code

## NOW IT'S TIME TO DO

Don't Just go through the example code--Run It

Only reading is not sufficient, write your own code

Follow good books and websites

## TIME TO DISCUSS AND DEBUG

Error is common things in programming, so learn to use a debugger

Discuss problems with your friends

Keep the mind calm and don't go fast

## TIMES TO FOLLOW THE FORUM

Create an account on the popular forum like StackOverflow, code project etc.

Write your problem on forum that helps you to learn new things

Keep learning and always seek out more sources
